ABOUT ME

Blockchain engineer specializing in Ethereum-based smart contracts, cross-chain interoperability research, and decentralized application development. Hands-on experience building proof-of-concept bridges, validator logic, and full-stack Web3 applications using Solidity, Hardhat, Node.js, and React. Strong academic background in distributed systems, cryptography, and blockchain security, with applied research experience at DRDO and Astraeus Next Gen.

EDUCATION

Bennett University Bachelor of Computer Applications (Honours)

Greater Noida, Uttar Pradesh, India | bennett.edu.in

Sep 2022 – Jul 2025

CGPA: 8.78/10

- Coursework: Algorithm Design Strategies, Operating Systems, Object-Oriented Programming (Java), Blockchain, Cryptography, Database Management, Distributed Systems.
- Capstone Research: Blockchain interoperability protocols in collaboration with DRDO and Astraeus Next Gen.
- Honors: Outstanding Academic Achievement in two consecutive semesters with SGPA scores of 9.48 and 9.2.
- Activities: Active member of ICB Student Chapter; participated in hackathons and technical symposiums.

WORK EXPERIENCE

Assistant Manager IT Web3 — AGP Remote, India

Dec 2025 – Present

- Contribute to the development of a **RWA asset and financial infrastructure platform**, supporting regulated investment workflows and asset lifecycle management.
- Develop and maintain **365+ backend APIs** using Next.js, TypeScript, PostgreSQL, and Supabase, supporting onboarding, governance, compliance, transaction, and operational workflows.
- Design and implement backend services, access-control systems, audit mechanisms, and business logic for multi-role enterprise applications.
- Contribute to a platform data layer comprising **60+ database tables** and **140+ migrations**, with a strong focus on security, data integrity, and maintainability.
- Build workflow-driven applications and operational tooling used across **5 user roles**, supporting business, compliance, and administrative processes.
- Implement identity verification, governance, approval, reporting, and asset-management workflows within regulated business environments.
- Evaluate third-party infrastructure providers across identity, compliance, custody, wallet, and blockchain services; perform technical due diligence, solution analysis, and integration planning.
- Develop automated testing frameworks covering authorization, workflow validation, business rules, and critical platform operations.
- Built the complete smart-contract validation suite using **Foundry**, delivering **3,300+ test cases** across **130+ test suites** covering Unit, Fuzz, Invariant, RBAC, Integration, Attack Vector, and State-Machine testing.

Blockchain Developer Intern — Astraeus Next Gen Remote, India

Dec 2024 – Apr 2025

- Built and tested proof-of-concept cross-chain bridges using **Node.js**, Solidity, Hardhat, and Ethers.js.
- Maintained **90%+ test coverage** for smart contracts and participated in peer code reviews following Agile best practices.
- Created reusable deployment scripts and internal technical documentation to streamline onboarding.

Blockchain Research Intern — DRDO Delhi, India

Jan 2025 – May 2025

- Researched trustless cross-chain communication protocols with a focus on **secure asset transfer** across Ethereum-compatible networks.
- Produced technical diagrams and structured documentation to support research proposals and publication preparation.
- Collaborated with an interdisciplinary team to evaluate interoperability solutions and define security standards for future projects.

LANGUAGE SKILLS

English Proficiency – IELTS (Academic)

Overall Band Score: 7.0 (C1) Listening: 8.0 Reading: 6.0 Writing: 7.0 Speaking: 6.5

SKILLS

Programming Languages	Python, JavaScript (ES6+), TypeScript, Solidity, C++, SQL
Frameworks & Libraries	React.js, Node.js, Express.js, Tailwind CSS, Hardhat, Ethers.js, Web3.js
Databases	MongoDB, Supabase, PostgreSQL, MySQL, Firebase
Tools & Platforms	Git & GitHub, Docker, VS Code, Postman, Vercel
Core Competencies	DApp Development, Smart Contracts, Full-Stack Web Development (MERN), RESTful API Design, Agile/Scrum Methodologies
Soft Skills	Team Collaboration, Technical Communication, Research Writing, Problem-Solving, Critical Thinking

PROJECTS

IditTrack (July 2025 – August 2025)	Micro SaaS Inventory & Order Management System	GitHub Repo
- Architected and developed a full-stack web application using the MERN stack (MongoDB, Express.js, React, Node.js) with modular design principles. - Implemented core modules for product catalog management, order tracking, and file uploads, with planned integrations for POS systems. - Containerized the application with Docker to streamline deployment and ensure environment consistency.		
HemoChain (July 2024 – Dec 2024)	Ethereum-based Blood Donation Management System	GitHub Repo
- Engineered secure Solidity smart contracts to manage donor-recipient matching and on-chain recordkeeping for a decentralized blood donation platform. - Developed a React frontend, integrating MetaMask for secure blockchain authentication and transaction signing. - Utilized IPFS for decentralized storage of blood records, ensuring data integrity and immutability. - Collaborated within an agile team to implement data validation and streamline user workflows, ensuring timely delivery.		
SathiSahyogi (Feb 2024 – May 2024)	Charity Crowdfunding Platform on Ethereum	GitHub Repo
- Developed and deployed Solidity smart contracts for crowdfunding campaign creation, secure contributions, and automated fund release. - Built a responsive frontend using React and Tailwind CSS, integrating MetaMask for seamless wallet connectivity. - Utilized Hardhat and Ethers.js for robust contract deployment and maintaining comprehensive test coverage.
